BUILDUPS VENTUS ERP SUITE

Powered By ERPNext

VENTUS

BE YOUR BEST IN
YOUR MOMENT OF
SERVICE™

OUR MISSION

At Ventus, our mission is simple: help organizations run smarter, faster, and without unnecessary complexity. We believe ERP should empower you not drain budgets or lock you into rigid systems. Built on open source strength with enterprise grade capability, Ventus removes barriers like expensive licensing, vendor lock-in, and inflexible workflows.

We offer true freedom with demand-driven modules. Start with what you need today one module if that's rightand scale confidently as your business grows. We understand ERP implementation isn't easy, but don't worry, you're not alone. Our team stays with you through implementation, post go live hypercare, and continuous support. Walking this journey together is our core value.

Ventus integrates seamlessly with your existing software, while our customization layer lets you adapt with minimal effort making transitions smoother and more comfortable. With a friendly, trusted team and flexible, lowcost approach, Ventus delivers ERP with confidence.

Our latest release Ventus services and maintenance for aerospace is set to be a game-changer in the aviation industry.

This is Ventus
Flexible ERP that scales with your ambition.

Carl Forssen
CEO - BuildUps Consultancy

ONE PLATFORM.
COMPLETE BUSINESS MANAGEMENT

Ventus is a comprehensive business management platform that brings together all your core operations from accounting and inventory to HR and CRM in one unified system.

Built on modern web technologies and designed with real-world business processes in mind, Ventus delivers.

Low Cost - Starting from a minimal license fee.

Scalability - Enterprise software is accessible to all business sizes.

Complete customization - Modify anything without vendor restrictions or feature request delays.

Rapid deployment - Get up and running in weeks, not months.

Active community - Thousands of developers and users sharing solutions and best practices.

Regular updates - Continuous improvements and new features released regularly.

DEPLOY ANYWHERE, YOUR WAY

Cloud Hosting

Let Frappe Cloud handle infrastructure, backups, and updates while you focus on your business

Self-Hosted

Deploy on your own servers for complete control and data sovereignty

Hybrid Options

Mix cloud and on-premise as your needs require

Whichever choice you make, you'll have exactly the same functional solution, no compromises. No forced upgrades or restrictions on customization.

Ventus is designed for portability, so you can transition between deployment models seamlessly. This means you're never locked into your original choice and are protected against changing requirements and regulations.

BUILT FOR YOUR BUSINESS

BUILT-IN MODULES FOR EVERY BUSINESS FUNCTION

General ledger, multi-currency support, accounts payable and receivable, bank reconciliation, tax management, cost center tracking, budgeting, financial reporting, and asset management—all integrated into one system

Lead and opportunity management, quotations, sales orders, customer portal, sales analytics, and campaign management enabling you to manage customer relationships and drive revenue efficiently

Purchase orders, RFQs, supplier management, purchase analytics, and supplier scorecards giving you control over your supply chain and vendor relationships.

Real-time stock tracking, multi-warehouse support, batch and serial number tracking, automated reordering, and barcode scanning ensuring inventory accuracy and efficiency across all locations.

Manage service requests, maintenance schedules, work orders, asset tracking, and maintenance analytics giving you full control over your maintenance operations, equipment reliability, and service efficiency

Bill of materials, work order management, production planning, subcontracting support, and capacity planning providing complete control over your manufacturing operations

Project planning, task tracking, timesheet management, resource allocation, and project profitability analysis enabling effective project delivery and cost control.

Employee records, attendance, leave management, payroll, expense claims, and performance management centralizing HR operations in one integrated system

Built-in webshop, product catalog management, payment gateway integration, and customer portal enabling you to sell online while staying connected to your core operations.

Complex assembly management, MRO tracking, regulatory compliance, and serial number traceability for mission-critical operations

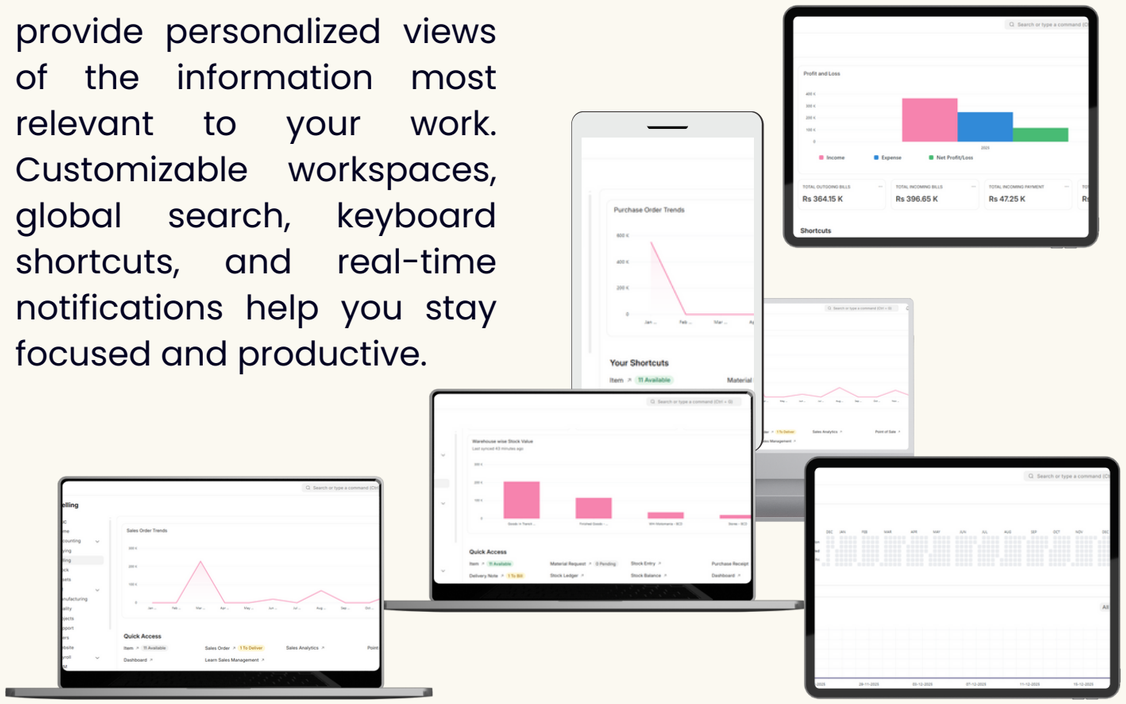

WELCOME TO A WORLD OF DELIGHTFUL EXPERIENCES

RESPONSIVE & INTUITIVE

Ventus is browser-based and fully responsive, automatically adapting to desktop, tablet, and mobile devices. Whether you're in the office or in the field, you get the same powerful functionality with an interface optimized for your device. In addition, Ventus also offers a dedicated mobile app, giving you seamless access on the go.

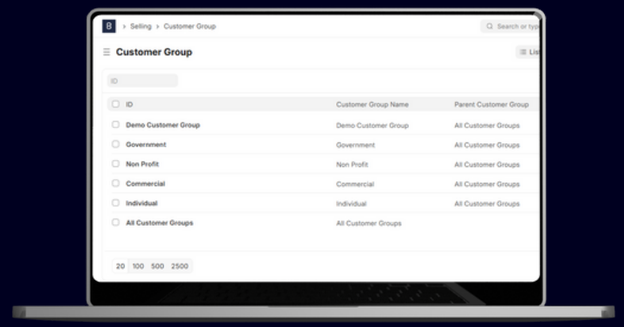

Role-based dashboards provide personalized views of the information most relevant to your work. Customizable workspaces, global search, keyboard shortcuts, and real-time notifications help you stay focused and productive.

The interface is designed to feel intuitive and modern reducing training time and increasing adoption across your organization. Only you know what's most important to your workflows. With ERPNext, you can surface that information immediately, helping you prioritize work and make better decisions faster.

SMART WORKFLOWS & AUTOMATION

Automate your business processes with visual workflow design. Configure approval hierarchies, conditional routing, and automated notifications without requiring development expertise. Business Process Modeling Notation (BPMN) provides a visual way to design and manage complex processes.

BUILT FOR DEVELOPERS & USERS ALIKE

Because Ventus is open source, developers have complete access to customize, extend, and integrate it with any software. The Frappe Framework provides powerful APIs, custom doctypes, server-side and client-side scripting, and full control over every aspect of the system.

Business users can customize without coding create custom fields, design custom forms, build custom reports, and create dashboards all through intuitive interfaces. No vendor restrictions. No waiting for the vendor to implement your requirements.

This level of customization freedom means Ventus truly becomes your system, built exactly to support your business processes and competitive advantages.

DEPLOYMENT FLEXIBILITY

Your Residency Choice

- Cloud: - Managed hosting through Frappe Cloud with automatic updates and maintenance
- Self-Hosted - Deploy on your own infrastructure for complete control and data sovereignty
- Hybrid - Combine cloud and on-premise deployments as needed

Supporting Your Success

Ventus is backed by an active global community of thousands of users and developers. Access extensive documentation, video tutorials, community forums, and GitHub discussions. An annual conference brings users together to share experiences and best practices.

Security & Compliance

- Role-based permissions and document-level security
- User authentication and two-factor authentication
- Audit trails tracking all changes
- HTTPS encryption for data in transit
- Regular security updates and vulnerability patches
- GDPR compliance tools for data protection

"Ventus brought structure to our growing business. The inventory management alone paid for itself in the first quarter."

Mr. Dinuka Hettiarachchi

OPEN & CONNECTED DIGITAL BACKBONE

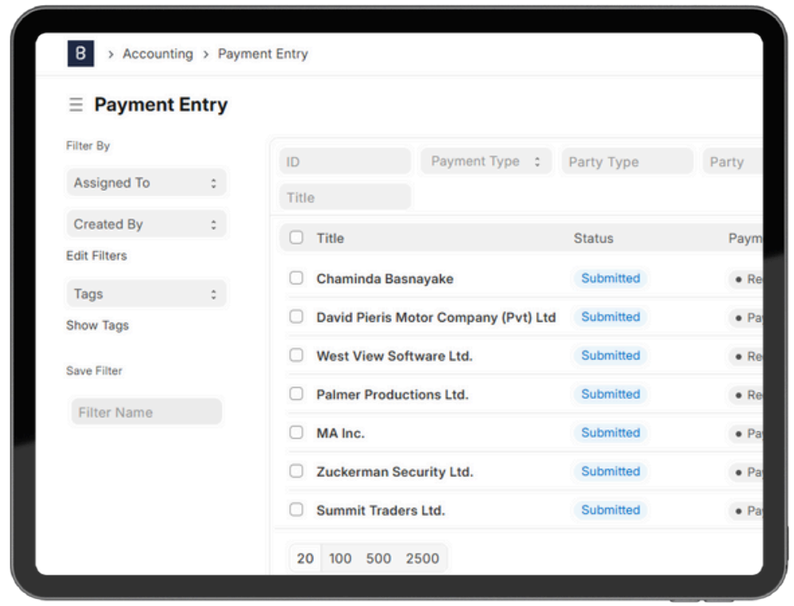

Ventus is built completely around standards-based open APIs.

Integrate with payment gateways, shipping carriers, email systems, SMS/WhatsApp providers, and any other business tools. Real-time webhooks provide event notifications. Data import/export through Excel and CSV enables seamless data movement.
This open architecture means you're never locked into proprietary integrations. You control your technology ecosystem.

EMBEDDED INNOVATION, BUILT FOR CHANGE

Ventus is designed to evolve with your business. Regular updates and new features are released continuously, ensuring you always have access to the latest capabilities without mandatory upgrade timelines or version restrictions.

The platform supports emerging technologies: REST APIs for custom integrations, automation through server scripts, machine learning capabilities, and modern web technologies that keep your system current and performant.

THE FUNCTIONALITY YOU NEED, WHEN YOU NEED IT

Start with the modules that matter to your business today, and seamlessly add new capabilities as your organization grows. Ventus's modular design means you can expand your system without complex integrations, migrations, or additional licensing costs.
Every module works together from day one, sharing a single data model. Add procurement today, manufacturing next quarter, and advanced analytics next year all from the same platform, all without vendor lock-in or rip-and-replace implementations.

FINANCIAL ACCOUNTING & MANAGEMENT	SALES & CRM	PURCHASING & SUPPLIER MANAGEMENT	INVENTORY & WAREHOUSE MANAGEMENT	MANUFACTURING & PRODUCTION	PROJECT MANAGEMENT	HUMAN RESOURCES	E-COMMERCE & WEBSITE	ASSET MANAGEMENT	SUPPORT & HELPDESK
